

DID YOU KNOW?

By Treasurer Debra Weyers, Class of 1979

Hearing aids have come a long way! In the past, they were large and bulky, making them hard to hide. Today, hearing aids are much smaller, more comfortable, and packed with advanced technology. Tiny hearing aids are even made for babies and toddlers, designed to fit their small ears. Many modern hearing aids can also connect to smartphones, stream music, and adjust to different listening environments.

Here is the "Then and Now" style of hearing aids.
